

# PACIFY

## HOW DOES IT WORK?

The product **PACIFY** is only repellent to drive away the field rats. This product is based on organic derivatives hence will not kill the rats, affect the earthworms, hens, grazing animals and aquatic animal.

The product is designed in such a way that rat go away from the field either by consuming the product or by smell of the product as the pack contains two component one is (in) for consumption and other one is (out) smell based repellent granules.

## COMPOSITION

Wild plant extract	20%
Organic matter	70%
Acid insoluble silica	10%
<b>Total</b>	<b>100.0%</b>

## DOSAGE & APPLICATION

- 3 kg per acre
- 7.5 kg per hectare

Product quantity required per acre is about 3 kilos 1kg (in 1/2 + out 1/2).

- In is to be applied at spoon per burrow and out is to be applied around the field on the bunds (linear application).
- If burrows are not seen in the field, both (in & out) can be mixed and applied on the bunds.

The result of the application will be seen by next three days that no rats will be visible and efficiency will last for 30-45 days minimum.
