

Nano Magnesium

Nano Magnesium has a particle size of less than 100 nano meter and with a potency of 14,000 ppm. Nano Magnesium is totally bio available.

Components	(%) w/w
Magnesium as Mg	1.4
Organic Acids	12.50
Organic Acids	3.00
Biopolymer 1	0.50
Biopolymer 2	2.50
Preservative 1	0.10
Preservative 2	0.50

Benefits

- Builds up resistance
- Completely water soluble formulation
- Effectively combats the thermal stress
- Enhance chlorophyll
- Improves plant growth
- Activates specific enzyme systems

Dosage & Application | 14,000ppm

1 L replaces 6.25kg ${\rm MgSO_4}$ anhydrous or 8kg dolomite of 8% moisture

For use in vegetative phase once in 30 days. Apply via foliar spray or root drench.

Crops	
Rice, cotton, corn	8 ml/L
Vegetables	5 ml/L
Horticulture	10 ml/L
All other crops	1.5 L/acre
