

Treatment of Blood-to-Blood Meal Fertilizer

AG PROTECT – A blend of essential oils, herbal extracts, surfactants, organic acids, and colloidal silver to control flies, neutralize odors, eliminate pathogens, and improve blood as a fertilizer.

Components
Essential oils such as: Anise Oil, Cedar Oil, Chrysanthemum Oil, Citronella Oil, Clove Oil, Emulsifiers, Eucalyptus Oil, Garlic Oil, Jojoba Oil, Lavender Oil, Orange Oil, Peppermint Oil, Rape Seed Oil, Thymol Oil and Tulsi Oil
Chelating Agents
Herbal Extracts such as Yucca
Surfactants
Organic Acids
Colloidal Silver

PROCESS

HOW OUR TREATMENT WORKS

Eliminate flies and maggots that accumulates in the slaughter blood

Neutralizes unpleasant odours from the blood

Eliminates pathogenic organisms found in the slaughter blood

Improves the biological oxygen demand as needed by microbial blend during the decomposition process of the organic matter

Responsible for the decomposition activities of the blood and improves its properties as a usable fertilizer
