

Hydromax

Hydromax is one single product designed to provide all the nutrients required by plants in a liquid form with constituents such as the basic elements like N, P, K etc in ionic form free from other elements like chlorine which form mineral salts.

Components	Qty
Nano Nitrogen	4.01
Chemical Nitrogen	9.90
Amino acid	2
Nano Phosphorous	0.87
Nano Potassium	0.93

Components	Qty
Nano Calcium	0.06
Nano Magnesium	0.04
Enzymes	0.2
Organic Acids	0.8
Other Nutrients	

Benefits

- Recommended for hydroponics because of its liquid state and very soluble in water
- Since the constituents are basic elements like N,P, K etc in ionic form free from other elements like chlorine which form mineral salts
- Promotes strong and a healthy plant
- Nutrient requirement varies between growth phase and reproductive phase. Also it varies from species to species. It is also dependent on temperature, pH of soil/water substrate etc. Hence farmer may need to use other fertilizers if required when the plants show such deficiency symptoms if any. We give individual mineral nutrients also

Dosage & Application

Depends on the crops, area, and sizes, depending on the method of fertilization
