

# PROTEGER

## HOW DOES IT WORK?

**PROTEGER** is a perfect broad-spectrum Multi-Tasking Ge Next organic biotic stress control formulation. This is 5-in-1 antioxidant giving control of biotic stress caused by sucking pest, larva, mites, fungus and Bacterial disease. It disrupts insect growth and development cycle by blocking hormone release upon ingestion or contact. Proteger gets easily absorbed and translocated in the plants system inhibiting the biotic stress caused by pest / pathogen development. Highly effective translaminar action makes it a potent product even at very low dosage. It supplements Vit K to plant. Vitamin K is an important chemical in green plants, where it functions as an electron acceptor in photosystem during photosynthesis.

## BENEFITS

- **Broad spectrum**
- **Controls aphid, white fly, jassid, bugs, etc.**
- **Free of toxic & solvent residue**

### COMPOSITION

Vitamin K	2.0%
Polysorbate	3.0%
Capsicum oil	95%

### DOSAGE & APPLICATION

**Foliar:** Use 250–300 ml/acre; apply as foliar application at vegetative and flowering stage.

Add to mixing tank with half of the amount of water you wish to apply. Allow the solution to completely mix then add the remaining water to the tank.

### FORMULATION TYPE

Emulsifiable concentrate

### CROP SPECTRUM

Recommended to be used on crops ranging from cereals, pulses & legumes, oil seeds, fruits, vegetables, fodder, fiber, flowers, green house, forestry, indoor plants, etc.

### ANTIDOTE

Treat symptomatically as there is no known antidote.
